

# GIVING BACK

Partnering with VSP® network doctors, VSP Global® Eyes of Hope® supports communities around the globe through initiatives that provide access to eye care, eyewear, and disaster relief where they're needed most.

In 2016, we reached a milestone by providing access to eye care for 1 million people in need, and we've committed to helping a #MillionMore by 2020.

**Mobile eye care clinics** partner with VSP network doctors and charitable organizations across the U.S. on outreach events that provide eye exams and glasses where they're needed most.

Gift certificates, including **Sight for Students®** and **Disaster Relief**, connect adults and children in need to a local VSP network doctor for no-cost eye care and eyewear.

**Eye Make A Difference®** is an easy way for eye care practices and VSP clients and members to donate glasses for distribution by VSP network doctors on global eye care mission trips. Marchon® Eyewear also donates thousands of new frames annually to charitable optometric organizations and projects.

**We See, A Child Eye Health Project**, in Soweto, South Africa, increased long-term access to eye care through optometric education, a measurable school-based vision screening program, and a free eye care clinic over three years. At project end, the equipment was donated to provide sustainable access to eye care in the community.

Beyond Eyes of Hope, **Corporate and Employee Giving** programs provide opportunities for VSP Global employees to participate in eye care outreach and give back to their communities, whether individually or as part of a team.

**8,500 VSP network doctors** annually supported in providing access to care

**1.8 million people in need** gained access to no-cost eye care and eyewear

**119,000 community members** affected by disaster gained access to eye care and replacement eyewear
